

PNAS Template for Supplementary Information

This PNAS template for Supplementary Information (SI) may be used to organize your supplementary material. **Once formatted, this first page should be deleted by removing the `\instructionspage` command.** The template is intended to provide a clearly organized PDF file that will ensure readers can easily navigate to sections or specific figures and tables. Movie files or large datasets can be presented as separate files. Further information is available in the [PNAS Author Center](#).

Using the template

Specify the title, author list, and corresponding authors with the `\title`, `\author` and `\correspondingauthor` commands. The cover page will be automatically generated with the relevant description of the SI, by the `\maketitle` command.

Figures should be placed on separate pages with legends set immediately below each figure. Table titles should be set immediately above each table. Note that tables extending beyond the width of the page can be included in the PDF or provided as separate dataset files. Oversized/nonstandard page sizes are accepted as part of your SI Appendix file.

References cited in the SI text should be included in a separate reference list at the end of this SI file: (?) and (?).

Supporting information for Brief Reports is limited to extended methods, essential supporting datasets, and videos (no additional tables or figures).

Submitting SI

Delete this first page by removing the `\instructionspage` command, and then save your completed SI file as a PDF for submission. Further submission instructions are available [here](#).

20 **Supplementary Information for**

21 **Your main manuscript title**

22 **Author1, Author2 and Author3 (complete author list)**

23 **Corresponding Author name.**

24 **E-mail: author.two@email.com**

25 **This PDF file includes:**

26 **Supporting Information Text**

27 **PNAS Template material, to be removed**

28 **Subhead.** Type or paste text here. This should be additional explanatory text such as an extended technical description of
29 results, full details of mathematical models, etc.

30 **Heading**

31 **Subhead.** Type or paste text here. You may break this section up into subheads as needed (e.g., one section on “Materials”
32 and one on “Methods”).

33 **Materials.** Add a materials subsection if you need to.

34 **Methods.** Add a methods subsection if you need to.
